

Proof of Participation
Galaxy Training Academy 2026

YIMGA WANDJI KEVIN L'AGNEAU

has completed modules from the
Single Cell Track

This course was organised
by the Galaxy Training
Network, in collaboration
with:

- the Galaxy Project
- Galaxy Europe,
- Galaxy Australia
and the Australian
BioCommons
- TACC.

Instruction provided by our global
instructor community of Galaxy

The course consisted of a week
of online, asynchronous
training which enabled
participants to work at their
own pace and on their own
schedule. The workshops
consisted of a blend of
seminars and hands-on
practical work.
Each track lasts 3 days.

The Training Academy Organizing Team

Completed Tutorials

- **An introduction to scRNA-seq data analysis**
- **Single-cell Formats and Resources**
- **Pre-processing of 10X Single-Cell RNA Datasets**
- **Generating a single cell matrix using Alevin**
- **Clustering 3K PBMCs with Scanpy**
- **Pseudobulk Analysis with Decoupler and EdgeR**
- **Clustering 3K PBMCs with Seurat**
